Profile

DevOps Engineer with a background in software development and cybersecurity, experienced in AWS, Kubernetes, Terraform, Docker, CI/CD and observability. AWS Certified Solutions Architect – Associate and CKA certified, with hands-on experience building secure cloud infrastructure, automated deployment pipelines and production-ready Kubernetes environments.

Skills

- **Cloud:** AWS, EKS, VPC, IAM, EC2, S3, ECR, ALB, Route 53, ACM
- **Infrastructure & Containers:** Terraform, Docker, Kubernetes, Helm
- **CI/CD & GitOps:** GitHub Actions, Argo CD, Git, GitHub OIDC
- **Security:** SonarQube, Trivy, Checkov, Gitleaks
- **Observability:** Prometheus, Grafana, OpenTelemetry, Jaeger, Elasticsearch, Fluent Bit, Kibana
- **Systems:** Linux, Bash

Professional Experience

WHBrowns

DevOps Engineer | June 2025 – Present

- Designed GitHub Actions pipelines that automated builds, security checks, container publishing and deployments to Amazon EKS.
- Reduced pipeline execution time from approximately 5 minutes to 2.5 minutes using self-hosted runners, pre-installed dependencies and parallelised jobs.
- Integrated Gitleaks, Checkov, Trivy and SonarQube to detect issues across source code, infrastructure, containers and Kubernetes manifests.
- Provisioned AWS and Kubernetes infrastructure using Terraform, including VPC, IAM, EKS, ALB, Route 53, ACM and Kubernetes Ingress.
- Containerised microservices for 3 development teams and implemented secure GitHub OIDC authentication and automated health checks.
- Built Python automation tools for AWS cost optimisation, security auditing, server management and deployment validation.

Tkxel

Software Engineer | Feb 2022– Jan 2024

- Used Git-based workflows to manage source code, coordinate changes and support application releases.
- Worked with AWS services to support cloud-connected features and remote content delivery.
- Automated simulation and configuration workflows based on dynamic asset attributes and business rules.
- Built scalable systems supporting 25,000+ component combinations and 80+ concurrent events.

NOBORDER.z INNOVATION

Associate Software Engineer | Nov 2020 – Jan 2022

- Used Git for version control, feature integration and collaboration across distributed application components.
- Developed remote content-delivery functionality that enabled assets and environments to be released without client-side updates.
- Built scalable real-time communication and inventory systems supporting 10,000+ configurable assets.

Education

- **Master's in Cybersecurity and Digital Forensics**
University of Huddersfield (2024-2025)
- **Bachelor's in information technology**
University of Education (2016-2020)

Certification

- [AWS Certified Solution Architect - Associate](#)
- [Certified Kubernetes Administrator \(CKA\)](#)
